

## Capability Statement

### Engino

ABN: 74 644 382 212

### Engineering Clarity – Constructing Confidence.

Engino is a multidisciplinary engineering firm dedicated to transforming complex design concepts into precise, constructible digital models. Leveraging advanced Building Information Modelling (BIM) technologies and cloud-based platforms, we ensure seamless coordination across all project phases, from conception to completion. Our approach bridges the gap between consultants, contractors, and construction teams, enhancing constructability and delivery certainty.

#### Our Expertise

- **Engineering & Design:** Delivering practical, buildable solutions tailored to project specific requirements.
- **Digital Engineering:** Utilizing cutting-edge digital tools to optimize project outcomes.
- **BIM Modelling, Clash Detection & Management:** Ensuring model accuracy and resolving potential conflicts before construction.
- **Drafting Services:** Providing detailed and accurate technical drawings to support engineering designs.
- **As-Built Services:** Documenting completed structures to reflect actual conditions.
- **3D Scanning:** Capturing precise spatial data to inform design and construction processes.
- **Engineering and Designer Resource Secondment:** Providing skilled professionals to augment client teams as needed.

## Industry Sectors

Engino operates across various sectors, delivering tailored engineering solutions:

- **Infrastructure:** Developing robust systems that form the backbone of communities.
- **Mining:** Designing efficient processes and structures for resource extraction and processing.
- **Ports & Marine:** Engineering solutions that support maritime operations and logistics.
- **Architectural – Commercial:** Collaborating on commercial projects that blend functionality with aesthetic appeal.

## Project Lifecycle Support

Our services encompass the entire project lifecycle:

- **Early Contractor Involvement (ECI):** Engaging early to influence design and planning for optimal outcomes.
- **Concept to Tender:** Developing intelligent, data-rich models that inform decision-making and bidding processes.
- **Construction Support:** Providing ongoing technical assistance to ensure project fidelity and quality.
- **Post-Construction Services:** Offering as-built documentation and analysis for future maintenance and upgrades.

## Commitment to Excellence

At Engino, we are innovators, problem-solvers, and collaborators. Our focus on accuracy, coordination, and constructability ensures that every stage of delivery is driven by engineering excellence and project certainty.
